

To FCC Chair, Ajit Pai,

My name is Ellie Kemery, and I am writing you today, to encourage you to please protect my personal freedom (and the personal freedom of every american) to get open access to the web information. Your efforts to roll back net neutrality are anti-American and may lead to many people being unable to access the information that they need. Every person on the planet deserves access to information - and without net neutrality you put millions of people at risk of losing that right. Rolling back net neutrality means that you are making decisions that are not in the interest of the American people, but rather in the interest of big corporations. You work for us. Your job is to protect the people of this country and fight for their rights. This is a direct attack on those rights and will result for profit corporations being able to choose who get access to what. By design, for profit corporations base their decisions of what will bring the most value (ie. \$\$) to their shareholders. That is NOT in the interest of the citizens of this country that your supposed to serve. Please, do you job. DO what's right. DO NOT roll back net neutrality!

Thanks + I know you'll do what's right for every American.

Ellie Kemery  
Seattle, WA
